PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience building and automating end-to-end CI/CD pipelines on AWS. Proficient in Linux (RHEL 9), Docker, Kubernetes, Terraform, Ansible, and Jenkins, with a strong foundation in cloud networking, infrastructure-as-code, and container orchestration. Delivered a 70% reduction in manual deployment effort by architecting a fully automated 3-server pipeline with GitHub webhook integration. Holds Red Hat certifications in System Administration (RHCSA) and Containers (EX188). Eager to contribute to a forward-thinking team where DevOps best practices, reliability, and continuous improvement are at the core.

DEVOPS PROJECT EXPERIENCE

Automated CI/CD Pipeline on AWS

Tech Stack: AWS EC2 | RHEL 9 | Jenkins | Docker | Ansible | Git | CI/CD

- ▶ Designed 3-server DevOps architecture on AWS EC2 (Jenkins, Ansible, Docker Host).
- ▶ Implemented GitHub webhook-triggered Jenkins pipeline for automated Docker image build & versioning.
- ▶ Automated container deployment using Ansible playbooks and integrated Docker HEALTHCHECK.
- ▶ Reduced manual deployment effort by 70% through full CI/CD automation.

Secure Multi-VPC Cloud Infrastructure on AWS

Tech Stack: AWS | Linux | Nginx | Cloud Networking

- ▶ Architected secure 2-VPC networking model with public/private subnet isolation.
- ▶ Protected private EC2 workloads using Bastion-based SSH architecture.
- ▶ Configured NAT Gateway and VPC Peering for secure internal and outbound connectivity.
- ▶ Deployed and secured application via Nginx Reverse Proxy.
